EDUCATION

Thiagarajar College of Engineering

M.Sc. Data Science

CGPA: 7.45

The TVS School

12th

Percentage: 86.83%

Madurai

2023–2028

Madurai

2023

AREA OF INTEREST

Predictive Modeling, Machine Learning, Financial Data Analytics

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Python, Java Script
- **DataBases:** MySQL, Oracle, MongoDB, Redis, Neo4j

PROJECTS

ZenSpend – Financial Dashboard — React, TypeScript, Recharts, CSS

March 2026 – April 2026

Independent Project A personal finance dashboard featuring glassmorphism UI, interactive What-if simulator for projecting next month's finances, expense analytics with dynamic charts, and CSV/JSON export. Deployed live on Vercel with React Context for state management and localStorage for data persistence.

Smart Health Assistant — Mistral 7B LLM, OpenStreetMap API, Overpass Turbo

June 2025 – October 2025

Independent Project AI-driven health assistant using Mistral 7B LLM for symptom diagnosis and allergy mapping with Flask REST APIs and dynamic prompting. Built a React dashboard integrated with Overpass Turbo for real-time, location-aware hospital recommendations under 3-second latency.

Fertilizer Recommendation System — Python, ReactJS

October 2024 – December 2024

Group Project Developed a fertilizer recommendation web app predicting optimal fertilizers from soil NPK, pH and crop inputs. Built ML-driven nutrient analysis and crop-specific mapping with responsive React UI for farmers. Enabled precise, data-driven recommendations to optimize crop yield and soil health.

PROFESSIONAL EXPERIENCE

Gateway Software Solutions

Coimbatore

Project Intern

November 2025 – December 2025

Developed a scalable AI-driven telecom churn prediction and retention system using Python, Scikit-learn, XGBoost and model explainability to implement a profit-driven retention framework that computes expected churn-related losses and retention-action costs, enabling targeted, high-value customer interventions from large telecom datasets.

CERTIFICATIONS

- Descriptive Statistics with R Software – NPTEL
- Databases and SQL for Data Science with Python – IBM
- Probability & Statistics for Machine Learning & Data Science – DeepLearning.AI

RESEARCH

Advancements in Predictive Models for Sustainable Fertilizer Recommendations: A Literature Overview

ICETCSMA'25 – International Conference on Evolving Technologies in Computing Science for Multidisciplinary Applications

Status: Published

Conducted a literature review on predictive models for sustainable fertilizer recommendations, focusing on ML-based approaches. Evaluated model performance and identified key factors influencing agricultural efficiency and scalability.
